

Pizza Sales Analysis Project Report

1. Introduction

The Pizza Sales Analysis Project aims to evaluate sales performance and customer purchasing behavior using interactive data visualization. The dashboard provides actionable insights into revenue generation, order trends, popular products, and peak business hours, enabling data-driven decision-making for business growth.

2. Objective of the Project

The primary objectives of this project are:

- To analyze overall sales performance using key metrics.
 - To identify peak sales days and hours.
 - To determine the most and least popular pizza categories, sizes, and individual products.
 - To understand customer ordering behavior and preferences.
 - To provide insights that can help optimize menu offerings and operational planning.
-

3. Dataset Overview

The dataset consists of pizza sales transaction data with the following attributes:

- Order ID and Order Date
- Pizza Name
- Pizza Category (Classic, Chicken, Veggie, Supreme)
- Pizza Size (Small, Medium, Large, X-Large, XX-Large)

- Quantity Ordered
- Order Value / Revenue

The data spans multiple months of the year **2015**, allowing time-based analysis.

4. Key Performance Indicators (KPIs)

The dashboard highlights the following KPIs:

- **Total Revenue:** \$70,397
- **Total Orders:** 1,840
- **Total Pizzas Sold:** 4,261
- **Average Order Value:** \$38.26
- **Average Pizzas per Order:** 2.32

These metrics provide a high-level overview of business performance.

5. Sales Trend Analysis

5.1 Daily Sales Trend

- Tuesday records the highest number of orders.
- Monday and Friday also show strong order volumes.
- Saturday has comparatively lower order counts.

5.2 Hourly Sales Trend

- Sales peak during **lunch hours (12–1 PM)**.

- Another significant increase occurs in the **evening (5–7 PM)**.
 - Order volume decreases sharply after **9 PM**.
-

6. Busiest Days and Times

- Orders are highest on **weekends**, especially **Friday and Saturday evenings**.
 - Peak operational hours are **12–1 PM** and **4–8 PM**, indicating strong lunch and dinner demand.
-

7. Sales by Pizza Category

- **Classic category** contributes the highest number of orders and revenue.
- Sales distribution across categories is relatively balanced:
 - Classic
 - Veggie
 - Chicken
 - Supreme

This indicates diversified customer preferences with a slight dominance of Classic pizzas.

8. Sales by Pizza Size

- **Large-sized pizzas** contribute the highest percentage of sales (~46%).
- Medium and Regular sizes follow in popularity.

- X-Large and XX-Large sizes have minimal contribution to overall sales.
-

9. Category-wise Pizza Sales

Total pizzas sold by category:

- **Classic:** 1,236
- **Veggie:** 1,040
- **Chicken:** 994
- **Supreme:** 991

The Classic category leads in overall volume.

10. Best-Selling Pizzas

The top 5 best-selling pizzas by quantity sold are:

1. Barbecue Chicken Pizza
2. Hawaiian Pizza
3. Thai Chicken Pizza
4. Classic Deluxe Pizza
5. California Chicken Pizza

These pizzas are major contributors to revenue and customer satisfaction.

11. Worst-Selling Pizzas

The bottom 5 pizzas by quantity sold are:

1. The Brie Carre Pizza
2. The Calabrese Pizza
3. The Spinach Supreme Pizza
4. The Mediterranean Pizza
5. The Soppressata Pizza

Among these, **The Brie Carre Pizza** performs the weakest in both orders and revenue.

12. Best and Worst Seller Insights

- **Best Sellers:** Classic Deluxe and Chicken-based pizzas consistently generate high sales and revenue.
 - **Worst Seller:** The Brie Carre Pizza shows the lowest demand and may require promotion, recipe revision, or removal from the menu.
-

13. Dashboard Features

- Interactive visuals for daily and hourly trends.
 - Category and size-based sales analysis.
 - Best and worst product identification.
 - Date and month slicers for time-based filtering.
-

14. Business Recommendations

- Focus marketing efforts on **Classic and Chicken pizzas**.

- Promote **Large-sized pizzas**, especially during peak hours.
 - Introduce special offers during low-demand hours.
 - Re-evaluate or improve low-performing pizzas.
 - Optimize staffing and inventory for weekends and peak times.
-

15. Conclusion

The Pizza Sales Dashboard provides a comprehensive overview of business performance, highlighting key trends and customer preferences. By leveraging these insights, the business can enhance operational efficiency, increase revenue, and improve customer satisfaction through targeted strategies.
